

Semper Dental

"always looking after your oral hygiene"

INFORMATION FOR PARENTS AND CARERS

Semper Dental's biannual treatment program is available to all participating school students on the following basis:

1. Families who are in receipt of Family Tax Benefit Part A are eligible for the Medicare Child Dental Benefit Scheme Funding of up to \$1,095 every two years.
For additional CDBS details please visit:
<https://www.humanservices.gov.au/individuals/services/medicare/child-dental-benefits-schedule>.
2. Families not in receipt of Family Tax Benefit Part A are offered a very generous fee for service treatment for \$99.00. This covers the cost of an examination, scale, clean and fluoride. (Item numbers 011, 111, 114, 121)

Families with private health insurance are required to pay their invoice first and once paid we will issue you with a receipt for you to lodge a claim with your insurer.

The twice-yearly treatment program is offered in accordance with The Australian Dental Association recommendation that all primary school age children should see the dentist every six months and therefore we operate a twice yearly preventative treatment program at your child's school. This is important to ensure that your child's teeth are well maintained, and six-monthly treatment will minimize the chance of decay.

The services provided and the **convenience of being carried out at the school** makes it **easy for you** to have your child treated in this time and cost-effective way.

At each visit we provide a preventative treatment program. Preventative treatment involves an oral examination and treatment such as scale, cleaning, fluoride application and fissure seals where necessary.

Once completed we will provide you with a report on each visit and will inform you if your child requires additional dental care.
